

Tom & Apple - The Apple-Market Curriculum

Building from square one, not finding the class back at square one.

Unit 1: Sentences & Questions: Tom & Apples (2-4 Classes) Aim: Teach the most basic sentences starting from square one. (e.g. Tom has an apple. The apple is red.)	Description: Students are introduced to the characters Tom & Betty, and the theme of apples. Students use pictures they draw to understand and learn basic sentence forms, drawing what the sentence describes first to anchor their understanding.
End of Unit Goal: Students can "translate" or "transfer" back and forth between a picture-form, spoken/listening form, and a written-sentence form for basic sentences and questions.	
Unit 2: Buying and Selling: The Apple-Village Market (2-4 Classes) Each student has their own shop in an apple-market. Aim: Skills: - Questions - Offers - Requests, - Buying and Selling (shopping) terms and phrases	Description: They have a price/order-form/accounting sheet to keep track of what goods are being bought and sold by each shop (each other student). They are given paper-cut-out products and a fixed quantity of silver and gold - part of the game is the continual change in prices based on the changing situation, which the student really get into. Many different games and "mini-quests" are possible.
End of Unit Goal: Using an accounting-sheet and (fake or real) items and money/currency, students can ask and answer questions about price, availability and what people want, and can do "quests" where they must buy, sell, and use various item, (e.g. buy X,Y,Z (including BTU's of energy) to Bake a pie, using market-value currency) both alone and coordinating with a partner.	
Unit 3: Schedules, Time, and Planning: Tom's & Beth's Weekend (3) Lesson 1: Fill-in gaps in sentences and a schedule planner (A-B fill-in) with paragraphs using two forms of sentences. Lesson 2: <u>Make your own weekend schedule planner and paragraphs with a partner (+ review of part 1)</u> Lesson 3: Practice making all-tenses of questions and answers about a schedule. (A-B Q-A activity)	Description: Integrates: - Schedules: using calendar-planner schedule tools - Time of day and clock times - Days of the week (and other day-terms) - Tense (in a concrete (not arbitrary) way) - Question Words (especially about times and actions) + A story, Humor, Creativity, Direct Integration with Past Lessons
End of Unit Task Goal: Students can use past, present-perfect, future, and "every-day" tenses in both questions and answers using both a schedule-planner grid and a paragraph description of what is happening + using both Time-Then-Event and Event-Then-Time forms of sentences, (E.g. At 8am he X. He X at 8am.))(including using a tense-neutral form in a planner but using a tense specific form in a sentence or question).	
Unit 4: Schedules + Shopping	...
End of Unit Task Goal: Futures: Profitably buy and resell an item that you don't have yet using only English, and using schedules and plans made with other "market players."	

Apple Market Puzzles

1. Find The Time:

- They each have an assigned schedule that when overlapped leave two slots (or one)

when they can all meet.

- Have them pick a (find the) time when they can meet.

(talk to one person at a time...hmm...maybe like a telephone)

...find the time 2?

1.1 - easy to guess, only a few slots (defaults to one person asking everyone else - which is fine)

1.2 - harder to guess, more free time-slots

1.3 - using telephones? (checking by one-to-one asking)

2. Stay On Budget:

- You each have a store, and you each have prices.
- Your task/quest is to get the ingredients to make a product
- (including BTU's and packaging)
- on your budget...

to do this you will need to compare the prices of each vender. Otherwise you will not be able to afford everything you need.

1. 10 apple pies for 9 silver

2. Apple Role Cake, Vegetable Pie, Stone Pie

- apples, honey

- flour, kabocha,

Puzzle 2 Example

Need	Have
Apple Role Cake: apples, honey, flour, white wine, strawberries, oil, salt	(Pets: fish, frogs) okinawa black sugar, honey
vegetable pie: squash, carrots, onions, daikon,	apples, strawberries, stones (rose quartz)
stone pie: stones (rose quartz) fish, frogs, flour, okinawa black sugar	flour, white wine

3. Deadline

- Here your primary limitation is not the budget, but the time.
- Each person has a store, products, prices, and delivery times.
- You must match up the correct delivery times in order

4. Deadline & Budget

- Here your limiting parameters are both time and money.
- Each person has a store, products, prices, and delivery times. Simply choosing the fastest delivery option in all cases will bring you over-budget.

5. Fill the Order 1: Profit-Sharing - Wheel and Deal

- Here a certain amount of profit can be made by filling an order by a given deadline.

-But...you cannot afford to do this simply by buying all the parts at market prices.

- So, you will need to partner with another business so that together you can profitably fill the order.

- [But] You will have to agree on how to split the profits. If you cannot agree in time then you cannot fill the order.

Part 1: Units 1-4 : From First Basic Sentences & Questions to Practical Group-Coordinated Puzzles

Unit 1: Sentences With Tom & Apple - Make basic sentences and questions. [SVO, Who, what where, when]

(Unit 1 + Pronunciation Practice)

Unit 2: The Apple Market Village: buy, sell, ask, offer; fill out forms

Unit 3: Schedules 1: basic times and dates

Unit 4: Schedules 2: Market Puzzles & Quests

~6 sets of puzzle-coordination games, practical problem solving.

(find the time, stay within a budget, plan to close a futures contract then sell)

? numbers?

Part 2: Units 5-~7 : Real Life Skills & Modes of Using English

Unit 5: Telephone Skills (intro to)

Unit 6: Reporting Skills (intro to)

- Presentations

- Essays

- Reports

Unit 7: (Business) Email Writing Skills (intro to)

Unit 8: Panel Discussion (like Ibaraki's interactive English forum)

+

(See Use Any Text skills)

Part 3: Important Technical & Abstract skills (applied to same the market story)

Unit 8: Language for "Games" and Group Task Coordination

Unit 9: Money And Currency - Trading Internationally

Unit 10: Computer English & Basic Programing English
